

Mahmoud Alrimawi

Riyadh, Saudi Arabia / mahmoudbrimawi@gmail.com / (966)59-812-3470

Education

B.Sc. Software Engineering

King Fahd University of Petroleum and Minerals, Dhahran, Saudi Arabia

06/2024

I graduated with Second Honors and a cumulative GPA of 3.47/4. My concentration was in Computer Networks.

Experience

King Hussein Medical Center

Freelance Mobile Application Developer, Amman, Jordan

03/2025 - 07/2025

Developed a mobile application that stores dermatology medical resources and notifies its users of events or lectures. The application was written in flutter and hosted on AWS. Events are created and announced using a simple email ticketing system.

Obeikan Digital Solutions

Back-End Web Developer Intern, Riyadh, Saudi Arabia

06/2023 - 09/2023

Development and deployment of a Facial Recognition service using OpenCV's dlib. The goal was to allow a user to use facial recognition to sign in to work. This service was written using python's FastAPI and hosted on Google Cloud.

Projects

Golang Web Scraper

I wrote a web scraper in Go that transforms the Cisco Partner Locator website into a downloadable excel spreadsheet.

Network Transparent Application Gateway for Telnet

This is an exploratory research done under the supervision of Dr Waleed Al-Gobi at KFUPM. The goal of the project was to determine if software defined networks can be used to enhance the security of otherwise insecure systems. I utilize OpenFlow switches and a Ryu controller to centralize the management of the user credentials and permissions without any alterations to the Telnet clients.

Smart Menu

This project uses an AI to create personalized restaurant orders and deals based on the user's order history and the restaurant's order data. The front-end is built with React and Tailwind. The back-end is written in Python and utilizes the ScikitLearn library for AI training.

Skills

Go, Java, JavaScript, Python, Git, GitHub CI/CD, Docker, AWS Certified Developer Associate
