Dhahran, Saudi Arabia | Saudi National

Education

M.Sc. High Performance & Cloud Computing

King Fahd University of Petroleum and Minerals • Dhahran, Saudi Arabia

I am expected to graduate early 2028

B.Sc. Software Engineering

King Fahd University of Petroleum and Minerals • Dhahran, Saudi Arabia

06/2024

I graduated with Second Honors and a cumulative GPA of 3.74/4. My concentration was in Computer Networks.

Experience

Freelance Mobile Application Developer

King Hussein Medical Center • Amman, Jordan

03/2025 - 07/2025

Developed a mobile application that stores dermatology medical resources and notifies its users of events or lectures. The application was written in flutter and hosted on AWS. Events are created and announced using a simple email ticketing system.

Back-End Web Developer Intern

Obeikan Digital Solutions • Riyadh, Saudi Arabia

06/2023 - 09/2023

Development and deployment of a Facial Recognition service using OpenCV's dlib. The goal was to allow a user to use facial recognition to sign in to work. This service was written using python's FastAPI and hosted on Google Cloud.

Projects

Network Transparent Application Gateway for Telnet

This is an exploratory research done under the supervision of Dr Waleed Al-Gobi at KFUPM. The goal of the project was to determine if software defined networks can be used to enhance the security of otherwise insecure systems. I utilize OpenFlow switches and a Ryu controller to centralize the management of the user credentials and permissions without any alterations to the Telnet clients.

Skills

JavaScript, Python, Git, GitHub CI/CD, Docker, NodeJS

Certificates

AWS Certified Developer – Associate, CompTIA A+
